
Checking if cargo is installed
cargo 1.98.1 (797e8a9bc 2026-08-05)
Cargo, the Rust package manager, is not installed or is not on PATH.
This package requires Rust and Cargo to compile extensions. Install it through
the system's package manager or via https://rustup.rs/
Checking for Rust toolchain....
Rust not found, installing into a temporary directory
[end of output]
note: This error originates from a subprocess, and is likely not a problem with pip.
error: metadata-generation-failed
× Encountered error while generating package metadata.
╰─> litellm
note: This is an issue with the package mentioned above, not pip.
hint: See above for details.
PS C:\Users\CESAR> python --version
Python 3.14.2

- Consultar las versiones de Python

```
py -0p
```

- Crear una carpeta
- Acceder a ella desde modo comando
- Lanzar la creación del entorno con la versión de Python

```
python -m venv venv
```

```
py -3.12 -m venv venv
```

- Activar el entorno

```
C:\interpreter-env\Scripts\Activate.ps1
```

- Comprueba la version

```
python --version
```

```
    Directorio: C:\interpreter-env

Mode                 LastWriteTime         Length Name
